SUMMARY

Im a front-end web developer. Staying at the forefront of the ever-evolving digital landscape, I embrace new technologies and stay current with the latest trends, always striving to push the boundaries of what's possible. From responsive design to interactive animations, I am committed to staying on the cutting edge.

ACHIEVEMENTS

Technical Mastery:

- Demonstrated expertise in front-end and back-end technologies, ensuring the creation of robust and efficient web solutions.
- Acquired proficiency in languages such as HTML, CSS, Responsive , & Bootstrap

SKILLS

- Frontend Development - Expert
- Communication - Beginner
- Team working - Expert
- Multitasking Abilities - Expert

EDUCATION

Tender Feet boarding school - SEE / Jan, 2008-2023

koshi Saint James College / itahari / September, 2023 - Present

My journey in web development began during my school years at Tender feet boarding school. While the primary focus of high school is on general education, I took advantage of elective courses and extracurricular activities to delve into the world of web development.

PROJECTS

Snake game

The Snake Game, a classic from the late '70s, involves controlling a growing snake to consume food and avoid collisions. Preloaded on Nokia phones in the '90s, its simple yet addictive gameplay remains iconic in video game history

Login page

A login page is a user interface where individuals provide their credentials, such as a username and password, to access a secure system or application. It typically features input fields for user data and a "Login" button, serving as a gateway to authenticated services.

Weather App

A weather app delivers up-to-date information on atmospheric conditions for a specified location. Users can check current temperature, humidity, wind speed, and forecasts, making it a valuable tool for planning activities based on weather conditions.
